

enzie delux aluminium 3+1 **ROOF SPACE LADDER**

You won't have to bother with that shaky step ladder again when you transform your roof space into a convenient storage room. By installing an **enzie** roof space ladder you can access your roof space easily and safely. The Delux Aluminium is the right access system that can be used every day. The unit has a casing, insulated hatch and aluminium ladder with 3 folding and 1 sliding section.

SAFE:

A gas piston counterbalance on the hatch makes operation smooth, quiet and effortless. The ladder can't fall down on top of you or crash back up into the ceiling. The 75mm non-slip treads are a comfortable 240mm apart.

ALMOST INVISIBLE:

Your ladder is completely self contained and simply folds away on its hatch. A slimline architrave and concealed hinges make your ladder blend in with the ceiling so that it almost disappears.

ENERGY EFFICIENT:

The hatch is insulated and the unit is fitted with a rubber seal preventing drafts.

EASY TO INSTALL:

Your **enzie** roof space ladder comes fully assembled with built in installation clips for one man installation.

<i>Model No.</i>	<i>Ceiling Height</i>	<i>Opening Size.</i>	<i>Insulation</i>	<i>Assembly</i>	<i>Weight</i>	<i>Package Size</i>
