## DELUX FIRE RATED Roof Space Ladder

Delux Fire Rated 19-May-98

### Fire Rated:

For heavy-duty commercial applications a folding ladder that fits into the roof space or ceiling cavity is available from **enzie**. Manufactured to meet fire protection classification A60, designed for installation near machine rooms, lifts etc. The casing frame and hatch are manufactured in steel, and primed against rust. The hatch is insulated and equipped with self locking catch which can be completed with a lock cylinder. Delivered with an anodised aluminium ladder.

### Safe:

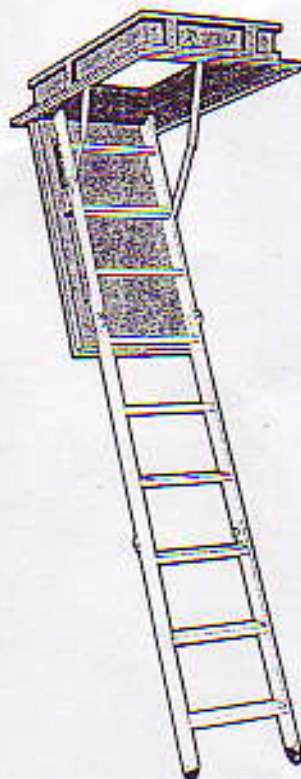

A gas piston counterbalance makes operation smooth, quiet and effortless. The ladder can't fall down on top of you or snap shut into the ceiling. The 75mm non-slip treads are a comfortable 300mm apart.

### Almost invisible:

The ladder is completely self contained and simply folds away on its hatch. A slimline architrave and concealed hinges make the ladder blend in with the ceiling so that it almost disappears.

### Easy to install:

The steel casing frame has pre-drilled holes for the fixing bolts.

### SPECIFICATIONS:

| Type      | Model No. | Ceiling Hgt | Opening Size | A mm | B mm | Weight Kg |
|-----------|-----------|-------------|--------------|------|------|-----------|
